John Cris Alegre

Software Developer

Labo, Camarines Norte | johncrisalegre@gmail.com | bastyvovo.github.io/my-portfolio | linkedin.com/in/johncrisalegre

Work Experience

System/Software Developer | Praetorian Intelligence Inc. | Daet, Camarines Norte *Jan 2024–October 2026*

- Architected cross-platform mobile app (Storewatch) and desktop app (HR Haven Pro) using Flutter, Riverpod, and Firebase / Cloud Firestore.
- Developed VB.NET enterprise systems and led technical modernization by transitioning software workflows to cross-platform Flutter applications.
- Managed backend (HR Haven Pro), query performance, and front-to-back end data integration.
- Utilized Git and GitHub for team version control, code reviews, and structured bug resolution.

Software Developer Intern | PhilHealth LHIO *Feb 2023–May 2023*

- Engineered two desktop administrative systems utilizing VBA, MS Access, and SQL for inventory management and member request processing.
- Contributed 60% of total interface design, bug fixes, and continuous feature updates.

Key Projects

Professional & Enterprise Projects

- **HR Haven Pro** (*Flutter* • *Riverpod* • *Firebase* • *Cloud Firestore*): Integrated HR system streamlining timekeeping, attendance tracking, and automated payroll operations to optimize workforce management.
- **StoreWatch App** (*Flutter* • *Riverpod* • *Firebase* • *Cloud Firestore*): Mobile application automating check-in/check-out time tracking and store inventory operations.
- **Admin Monitoring & Reporting System** (*VBA* • *MS Access* • *SQL*): Desktop administrative application designed for PhilHealth LHIO Talisay inventory management and automated reporting.
- **Members Monitoring System** (*VBA* • *MS Access* • *SQL*): Desktop application engineered for PhilHealth LHIO to track client memberships, member requests, and processing workflows.

Web, Backend & Mobile Tools

- **Load Server** (*Node.js* • *Express.js* • *Grammy Telegram Bot API* • *Git*): Backend request server processing load service requests with real-time Telegram mobile notifications containing customer numbers and load amounts.
- **Load Service** (*HTML* • *CSS* • *JavaScript* • *Responsive Design* • *Git*): Responsive frontend load service application allowing users to submit mobile load requests via a clean interface linked to the Node.js backend.
- **TIAO App** (*Flutter* • *Riverpod* • *Sqflite*): Lightweight mobile time tracking tool recording time-in and time-out using a local Sqflite database for offline record keeping.

Education

BS Information Technology (Dean's Lister) *2019–2023*
Camarines Norte State College

STEM Strand *2017–2019*
Labo Science and Technology High School

Skills & Stack

Languages: Dart, TypeScript, JavaScript, VB.NET/VBA, Java, Python, PHP, SQL, HTML, CSS
Frameworks & Tools: Flutter, Riverpod, Express.js, Node.js, Tailwind, Git/GitHub
Databases & Cloud: Firebase, Cloud Firestore, MySQL, Sqflite, MS Access
